

# THE "PAGE WRINGER,"

PATENTED NOV. 25, 1875.

## PRIZE MEDAL

Awarded this Wringer over a large number of competitors at the Ontario Provincial Exhibition of 1876.

### THIS WRINGER

Is made by skilled workmen, out of only the very best material, and is warranted substantial in every part.

**IT IS SIMPLE, NEAT AND DURABLE.**

Can be readily fitted on to either a round or square tub; has neither thumb-screws nor cog-wheels, and therefore requires no re-adjusting, but is always ready for work, and will wring with equal ease and convenience either a napkin or a large roll of clothes.

# THE WALKER WASHER.

The Prize Washing Machine of the Dominion, patented Sept. 22, 1874.

The WALKER WASHER has the following points of superiority over every other washer made in the country:—The frame is not made of Wood, but of the best Galvanized Cast Iron, which gives it neatness, strength and durability. It can also be easily adjusted with the Extension Rod, to fit any size of Wash-Tub. The small under Rollers have Rubber Rings attached to them, forming a perfect Cushion for the Clothes and prevents the buttons being broken or torn off.

It works on the principle of pressure, and will wash the finest Lace or the heaviest Carpets, without injury to the fabric.

# THE PAGE MANGLE,

PATENTED NOV. 25, 1875,

Is a neat, substantial, very convenient, and durable two roller Mangle. It has self-adjusting springs, and folding tables on each side, and is a thoroughly efficient Mangle in every respect, and is sold at a very reasonable price, so as to be within the reach of all.

**For sale—Wholesale and Retail.**

**EVANS & SON,**

14 St. John St., Montreal.
